

GOLDEN STATE INSTRUMENT CO.

GS-LCDTST35

3.5" TFT LCD

CCTV MINI TEST MONITOR

The GS-LCDTST35 is a mini portable CCTV test installation monitor. This ultra-portable test monitor is great for installing CCTV equipment. The large 3.5" Viewing screen makes it extremely easy to position cameras, focus lenses, and configure on-screen display menu functions. It even has an extra 12V DC output port for connecting to your CCTV cameras to make installation even easier.

With all the multiple video input connections, this makes an ideal must have troubleshooting tool that every installer needs. It includes a wrist strap for extra mobility during ladder installations. You can also use this as a mini monitor for DVR's where space is of a concern and use the included wall mount for permanent viewing applications. Rechargeable batteries are built in and recharged via the included 5 VDC transformer.

Features:

- Bright 3.5" TFT LCD Screen
- Multiple Composite Video Input connections (BNC Male)
- RCA Audio Input & Output (RCA Male)
- 12VDC (500mA) output jack
