

**GOLDEN STATE INSTRUMENT CO.**

## **GS-SOLPK-2**

**Solar Power Kit 12 VDC- 30 Watts**

### **Features:**

GSI's Green Line Products helps you save energy, money and the planet. With this easy to use starter kit you can power your 12vdc CCTV products solely from sun light alone.

- Eliminate or reduce energy costs of your CCTV system
- Use as a supplemental power source to existing system or as a stand-alone power source
- Environmentally Friendly
- Great for remote CCTV installations where DC electrical power may be difficult to source
- Scalability – Simple to add more GSI solar panels/chargers or batteries as your system grows and energy demand increases

### **Contents:**

#### **1 x GS-SLP-12-30**

12 Volt DC 30 Watt Solar Panel. Rugged heavy duty panel will withstand harsh weather conditions. This Solar panel charges your batteries while running your equipment at the same time. With just 6 hours of sunshine it can generate up to 180 watts/hour Approximately 21" x 20" x 1.5" inches

#### **1 x GS-SC-12-5**

12 Volt DC, 5 Amp charge controller. Regulates solar charging with full electronic protection for short circuits, reverse currents, over-voltage, overcharge and over-discharge. All of which greatly increases the life of the batteries 3 Multifunction LEDs easily give visual status of charge, power output, load status. Approximately 8" x 4" x 3" inches

#### **2 x GS-LIBAT-1210**

12 Volt DC, 10 Amps per Hour Lithium Ion batteries. Keeps your equipment running during the night and during times when no sunlight is available. These lithium ion batteries provide quicker charge time, slower "self discharge" and no "memory effect" unlike traditional lead acid batteries.
